Catalog,
1925.

RETURN POSTAGE GUARANTEED.
BISHOP'S TREE AND PLANT
FACTORY

Grower of and dealer in nearly everything

Fruit Trees of All Varieties, Ornamentals, Roses, etc.

Located at DEL ROSA HEIGHTS

R. F. D. No. 2, Highland, Cal.

PHONE SAN BERNARDINO 9483

Clair Bishop, Owner

We have a fine lot of Acacia Baileyana and Cultriformis Casurina Stricta and Decurans, also Rubber Trees, Golden Arborvitae, Italian Cypress, Palms, Guavas, Avocados, Umbrella trees, Freijoa trees, Heather, Ferns, etc.

We also have a complete assortment of all berry plants, rhubarb and over 50 varieties of roses that will surely meet your approval.

We have for this season 40,000 Deciduous Fruit Trees

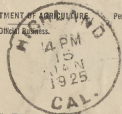

They are acclimated to this section, and should give you the best

I have a complete assortment of shrubbery suitable for San Bernardino Valley, and we are prepared to advise you what to plant and where to plant it, and also plant it for you if you wish.

I will not issue a catalog this year, as I am too busy to get it out. Please come to the nursery and select your plants, or have me call to see you.

~~CHERRYVILLE AND GARDENTOWN~~

~~Gold Medal Persimmon \$1.50-\$2.25~~

~~BEST Persimmon grown: Guaranteed to be grown on the famous root stock that produced the fruit that took the Gold Medal Prize at San Diego and took First Prize at Liberty Fair in Los Angeles. My grafts are also taken from this famous Gold Medal strain of the Hachiya variety. Several of my grafts that were put in in March produced fruit.~~

~~LA FRANCE RASPBERRY~~

~~This remarkable Raspberry was awarded FIRST CLASS CERTIFICATE OF MERIT by the Massachusetts Horticultural Society, Horticultural Society of New York, American Institute of New York and many others.~~

~~Also awarded SILVER MEDALS by Horticultural Society of New York, Tarrytown Horticultural Society, Connecticut Horticultural Society, etc.~~

~~The bushes are rapid, vigorous growers, the canes are strong and erect with fewer spines on thorns than other raspberries.~~

~~My plants bore fruit just four months after planting, and we are still picking berries at this writing, Jan. 5, 1922. These berries are firm, about twice the size of other raspberries, wonderful delicious in flavor. The La France is all "meat"; all berry; no all seeds. I believe you will be greatly pleased with this new introduction. It is claimed to stand shipping the best of any raspberry, which shows it is an excellent berry for commercial plantings as well as home garden. 50c each; \$4.00 for 10.~~

Thoughts are power. Think good thoughts.

NEW FRUITS THAT ARE GOOD WHITE SEEDLESS FIG

People with False Teeth Made Happy

The first crop has a very few seeds, but the other crops are absolutely seedless. Some of the figs measured nine inches in circumference this year. They are yellowish white with pink pulp, very mild flavor, firm skin, and do not eat the fingers in peeling as many figs do. There has never been a fig that soured on the parent tree.

We predict a great future for this fig, as it is a good canner, makes excellent preserves, will candy nicely, is also good for fig leather and many other uses to which figs are placed. It bears very young; our trees in nursery now, not over a foot tall, are loaded with small fruit. Prices 50c, 75c and \$1.00.

BISHOP'S COLOSSAL RHUBARB

In 1909 I began experimenting upon rhubarb and tried to see if it is possible to propagate a variety that would produce more and better rhubarb than any other. By careful selection and close attention, I produced a good variety. My original plant produced 25 pounds of marketable rhubarb at one pulling. One row of fifteen-month-old plants produced at ONE PULLING at the rate of \$2,000 an acre. There may be varieties that produce larger stalks, but I have not seen them. Many of these stalks weighed one pound each, which the stores say is as large as the public will willingly buy.

This rhubarb is excellent flavor, needs no peeling, grows throughout the year. Frost at 26 degrees F. will injure this rhubarb, but it is only about a month before you will have another good picking. I am propagating plants as fast possible, but it is a slow process. I want as many people as possible to try this wonderful producer, so I have decided not to sell over five plants to any one person this year. Prices: Subdivisions, 50c each; seedlings, 25c each.

BISHOP'S TREE BLACKBERRY

A heavy fruiter; easy to pick; fruit very firm; good shipper; can stay stiff; an upright grower, easy to prune. Ripe in June, July and August. Price, 25c each; 5 for \$1.

LOQUAT

The Gold Nugget is the largest and mildest Loquat I have seen. Some weighed five ounces each; three fill a pint jar. Bears late in the season. I have only seedlings to offer. The parent tree is isolated, so there is no chance of cross pollination. It is claimed 90 per cent will come true to parent. 50c and 75c each.

JAPANESE MOUNTAIN CURRANT

Is a new introduction from the mountains of Japan. Will stand quite a little freeze. This grows to be a tree about 12 feet tall, and is literally loaded with small, reddish currants. They make excellent jelly. Each family should have a tree. You will be greatly pleased with this excellent fruit. Do not forget to include an order for one tree for home use. Price each, quart cans, 50c; gallon cans, 75c.

....A man passed on to the next school room of life the other day owing me a nice little bill. His last words were, "Jesus paid it all." When will I get mine so I can pay my bills?

DO YOU KNOW THAT SHRUBBERY ENHANCES THE VALUE OF YOUR PLACE MORE THAN OTHER INVESTMENT? If you do not believe it, ask any real estate broker.

WHAT SHALL I PLANT AND WHERE SHALL I PLANT IT? TREES SUITABLE FOR NARROW PARKINGS

CONCLUSION

Every customer is entitled to receive, in good condition, sound, healthy trees or plants for which he pays. I will replace without charge any trees that are not in good, healthy and livable condition, provided I am notified inside of ten days. If you are not pleased with the goods you receive, I want the opportunity to correct any mistakes.

While I use every precaution to have all plants, bushes, etc., true to name, I will not be responsible for any sum greater than the cost of the stock should any prove otherwise than as represented. And in no case, where for propagating purposes, or for fillow orders, I secure seeds, plants, cuttings, cuttings or buds from others, do I assume responsibility or give any guarantee whatever. I guarantee all trees and plants to be in a livable condition when they leave the nursery, but my responsibility ends at that time.

In many cases we have our money tied up three or four years before plants and trees are salable, and our expenses are so high it is necessary for us to sell for cash when delivered. All orders are subject to above conditions and terms.

Yours very cheerfully,

CLAIR BISHOP.

P. S.—If you are not a booster for California, plant something and boost, and help beautify the earth. If I haven't got it, I will get it for you.

The prices listed are for one, but if you buy 10 of ANY ONE VARIETY we give you 10% off.

All prices quoted at nursery. However, I will pack and deliver free to depot any \$5.00 order. All small orders will be sent by parcel post. It is cheaper and handier

Take an auto ride to BISHOP'S PLANT FACTORY and get a house plant for your sick friend, wife or sweetheart. They will appreciate the gift.
